DR. MARK T. SHEEHAN
DR. JOHN T. SPIGNESI
MR. JOSEPH BARBERINO

September 25, 1996

Mr. Robert Parisi, Chairman
Town Council
Town Hall
Wallingford, Connecticut 06492

Re: Well Contamination Problem
Clintonville Road, Wallingford

Dear Chairman Parisi and Council Persons:

Local government and The Public Utilities Staff and The Public Utilities Commission should be lauded for their co-operation and expediency in responding to the above problem by providing laboratory facilities, personnel, and a viable way to bring potable water to this area.

Be advised that the investigation as to the cause of the problem is still ongoing, along with the assistance of the State Department of Environmental Protection.

The real applause should go to the residents of this area in question. While faced with a situation that was quite trying on a day to day basis, let alone the health risks, these people reacted with calm, dignity and respect toward city hall in order to reach a viable solution to the problem.

In the interest of the general health and welfare of the residents and future growth of the area, it is hoped that you act favorably upon the ordinance proposal to provide potable water to that area.

Respectfully,

George S. Yasensky
Registered Sanitarian
